

TPSh- M12 M132SH1W

Half Cell:

- 1. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 2. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 3. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 4. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 5. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 6. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 7. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 8. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 9. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 10. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 11. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 12. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 13. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 14. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.
- 15. The product is made of high quality silicon material, which is resistant to high temperature and high pressure, and has a long service life.

Qualifications and Certification

TPSh- M12 M132SH1W
630-670W

Mechanical Specification
